KOLIBRI

KOLIBRI

"The first, handheld, clinical health screening device for preventive screening, wellness coaching and remote medicine"

- 62 health parameters
- 24 signs of pathologies
- Personal and Clinical use.

FOCUS

Home testing: Provides relevant information to make and track lifestyle decisions.

- Remote medical monitoring: Simplifies regular health check-ups and follow up by Medical professionals.
- Clinical support: Specialist or Generalist in practice or remote monitoring of CVD & Diabetes type 2.

CATEGORIES

Health & Stress index – Complete Blood Count (8) – Electrolyte metabolism (3) – Glucose (1) – Lipid Metabolism (4) – ECG morphology (10) – Heart Rate Variability (27) – Cardiac health risks (23) – Risk of Diabetes 2 (1)

Lifestyle
Health and diet control.

Physical Health.
Emotional health.
Address health issues at
early stages.
Diet & Nutrition.
Track results of lifestyle
decisions.
Keep health balance.

Fitness & wellness
Physical training
monitoring

Monitor body rehabilitation.
Track training success.
Adjust workload.

Diabetes type 2
Daily control of Db2

Remote monitoring by a
doctor.
Health threat alert.
Prevent related CVD risks.
Tracks health changes.

KOLIBRI

Applications

“A unique solution for
home and clinical usage”

Elderly & CVD
Home Pathologies
monitoring

Remote monitoring by a doctor.
Save time on doctor visits.
Prevent emergency situations.
Remove fear of unknown.
Track status of pathologies.

Doctors & Hospitals
Remote monitoring

5 minutes patient health
assessment.
Efficient decision making.
Health threat alerts.
User-friendly patient
management.

Placements

Doctors, private practices,
clinics, hospitals, diagnostic
centres, nursing homes.

KOLIBRI

Applications

“A unique solution for
home and clinical usage”

On each page at the bottom, there are links to the Google Play store,
the Huawei AppGallery and a link to directly download the application.

and Video.

KOLIBRI: THE OUTCOME

“Lifestyle decisions to support wellbeing”

Health balance.
Monitor physical & emotional resource
balance to improve performance.

Sport.
Monitor physical activity results and track
body recovery after intensive training
sessions.

Diet
Reduce body stress by activating
parasympathetic activity through diet.

Diabetes type 2.
Determine cardiac risks at their early stages
and keep DB2 problem under control.

CVD.
Allows medical professional to look after
your health remotely, without regular
doctor visits.

KOLIBRI AT A GLANCE

“The power of AI in the palm of the Clinician or the Patient”

KOLIBRI

“Device being held during screening process”

5 minutes ECG signal is analysed via AI neural network to determine medical & lifestyle parameters.

Invention Uniqueness

Provides most comprehensive patient data to professionals or individuals.
Remote operation or face to face.
Medical grade lifestyle parameters and health risk determination for decision-making.

Technical and Clinical Uniqueness

AI neural network.
ECG noise filters.
Determination of potential Cardiac and non-Cardiac pathologies.
True preventive solution with early “signs” detection.

Business Model Uniqueness

Subscription as a service model.
Potential to add range of additional services with user-base growth.
End-to-end encrypted cloud-enabled structure for patient management & analytics.
